

Akash Yadav

Mobile: +91 82950 18966 — Email: akashydv04@gmail.com — LinkedIn — GitHub

Professional Summary

Senior Software Engineer specializing in Android development with 5+ years of experience in Kotlin, Java, MVVM, and modern mobile architectures. Passionate about building scalable, secure, and user-centric applications that drive business impact.

Education

- | | |
|--|--------------------------------|
| Guru Jambheshwar University of Science and Technology
<i>Bachelor of Technology (B.Tech) in Computer Science and Engineering</i> <ul style="list-style-type: none">Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, and Software Engineering. | 2016 – 2019
Hisar, Haryana |
| Government Polytechnic Rewari
<i>Diploma in Mechanical Metallurgy Engineering</i> <ul style="list-style-type: none">Developed analytical and problem-solving skills through engineering coursework and practical projects. | 2012 – 2015
Rewari, Haryana |
| Kendriya Vidyalaya Rewari
<i>Secondary Education (Class X)</i> <ul style="list-style-type: none">Built a strong academic foundation in Mathematics, Science, and Computer fundamentals. | 2012
Rewari, Haryana |

Experience

- | | |
|---|--|
| Mintoak
<i>Senior Software Engineer</i> <ul style="list-style-type: none">Leading architecture, design, and development of merchant-facing Android applications supporting digital payment solutions.Driving technical decisions, code quality initiatives, and mentoring engineers across the mobile team.Designed reusable application components using Kotlin, Java, MVVM, and Android Jetpack.Improved application performance, maintainability, and reliability through profiling, optimization, and automated testing.Collaborating with product, backend, QA, and business stakeholders to deliver high-impact customer features.Contributed to Android applications serving 100K+ merchants and customers across digital payment ecosystems.Reduced application startup time by 35% through performance profiling and optimization initiatives.Improved API response handling efficiency by 40%, enhancing overall application responsiveness.Mentored 3+ engineers and conducted code reviews to improve development quality and consistency. | April 2026 – Present
Remote |
| Mintoak
<i>Software Engineer</i> <ul style="list-style-type: none">Designed and developed scalable Android applications using Kotlin and Java.Implemented MVVM architecture, Android Jetpack components, and RxJava.Integrated and optimized RESTful APIs with backend and third-party services.Developed unit tests and participated in code reviews to improve software quality.Delivered secure and reliable mobile experiences through collaboration with cross-functional teams. | September 2022 – March 2026
Remote |
| Swipe (YC S21)
<i>SDE-1</i> <ul style="list-style-type: none">Developed scalable Android applications using Kotlin, Android SDK, and modern architecture patterns.Implemented networking layers using Retrofit and dependency injection using Koin.Integrated Firebase Analytics, Crashlytics, Push Notifications, and Remote Config.Built payment workflows using Razorpay payment gateway integrations.Participated in sprint planning, testing, and code reviews to ensure release quality.Integrated Razorpay payment workflows supporting thousands of monthly transactions. | November 2021 – September 2022
Hyderabad, Telangana |

- Reduced application crash occurrences by 25% through proactive debugging and monitoring using Firebase Crashlytics.

Truelancer.com

February 2021 – October 2021

Android Developer

Delhi, India

- Led end-to-end Android application development from requirements gathering to deployment.
- Integrated payment gateways including Stripe, PayPal, Razorpay, and Paytm.
- Implemented real-time chat and video calling functionality using Firebase and WebRTC.
- Improved application performance, stability, and user experience through continuous optimization.
- Integrated 4 major payment gateways including Stripe, PayPal, Razorpay, and Paytm.
- Implemented real-time chat and video calling features used by thousands of freelancers and clients.

The Spark Foundation

August 2020 – September 2020

Android Developer Intern

Remote

- Developed Android applications focused on performance, responsiveness, and maintainability.
- Collaborated with distributed teams to deliver new application features.
- Performed unit testing and debugging to ensure software quality.

Brain Bee LLC

June 2019 – December 2019

Technical Recruiter

Rewari, India

- Managed full-cycle recruitment including sourcing, screening, interviewing, and onboarding.
- Partnered with hiring managers to streamline recruitment processes and hiring outcomes.

Selected Projects

TribeOne Mobile App | *Flutter, Dart, Spring Boot, Firebase, REST APIs, Provider, GitHub Actions*

- Architected and developed the complete mobile and backend ecosystem using Flutter and Spring Boot.
- Implemented secure authentication, subscription management, and Razorpay payment workflows.
- Integrated Firebase services and REST APIs for real-time synchronization and analytics.
- Designed scalable state management using Provider and modular application architecture.
- Established CI/CD pipelines using GitHub Actions.
- Designed and developed 100% of the mobile application and backend platform from concept to production deployment.
- Automated build and deployment workflows, reducing release effort by 50% using GitHub Actions.

HDFC SmartHub Merchant Application | *Kotlin, Java, MVVM, REST APIs, Android Jetpack*

- Developed merchant-facing payment solutions supporting digital transactions and payment acceptance workflows.
- Implemented scalable features using MVVM architecture and Android Jetpack.
- Optimized API integrations and transaction flows to improve reliability and user experience.
- **Play Store:** HDFC SmartHub

Swipe Invoicing & GST Platform | *Kotlin, MVVM, Firebase, Retrofit*

- Built Android features for invoice generation, GST management, and payment tracking.
- Implemented modern Android architecture patterns to improve scalability and maintainability.
- Integrated Firebase services for analytics, notifications, and crash monitoring.
- **Play Store:** Swipe

Truelancer Freelancing Platform | *Kotlin, Retrofit, Firebase, WebRTC*

- Developed Android features supporting freelancers and clients across the platform.
- Integrated Stripe, PayPal, Razorpay, and Paytm payment gateways.
- Implemented real-time chat using Firebase and video calling using WebRTC.
- **Play Store:** Truelancer

Technical Skills

Languages: Kotlin, Java, Dart, Swift, SQL, JavaScript, C

Mobile Development: Android SDK, Flutter, Android Jetpack, Jetpack Compose, MVVM, Clean Architecture, Coroutines, Flow, RxJava

Libraries & Tools: Retrofit, Dagger/Hilt/Koin, Room, Git, GitHub Actions, Gradle, Firebase Analytics, Crashlytics

Testing: Unit Testing, JUnit, Mockito

Concepts: OOP, Design Patterns, Dependency Injection, CI/CD
